WORK EXPERIENCE

Duality Quantum Photonics

Bristol, UK

Quantum Researcher

October 2024 – Present

- Developed a Python simulation and optimisation library for lithium niobate crystals, enabling the design of high-purity single-photon sources for the company's next-generation chip architecture.
- Designed and implemented the company database using Google AppSheets, streamlining internal data management and improving accessibility for the engineering team.
- Built and deployed the company website using HTML, CSS, and vanilla JavaScript, with backend integration via Django and deployment on AWS (Gunicorn + Nginx), enhancing the company's public presence.
- Created high-fidelity emulation software in Python and C++ to simulate variational quantum optical circuits (including spectral degrees of freedom), used to model non-Gaussian continuous-variable resource state preparation with realistic imperfections.

EDUCATION

University of Oxford

Oxford, UK

MSc Mathematical & Theoretical Physics

Graduation Date: June 2024

- Grade: Distinction (80% avg.)
- Jesus College

University of Bristol

Bristol, UK

BSc Physics

Graduation Date: June 2023

- Grade: First Class Honours (86% avg.)
- Final Year Project: 'Building and Using a Mode-Hopping Acoustic Levitator'

AWARDS & SCHOLARSHIPS

- Peter Fowler Graduation Prize (2023) - for consistently excellent performance throughout BSc degree and graduating top of cohort.
- Faculty Prize (School of Physics, 2022) - for outstanding results in 2nd year of BSc degree.
- Boeing Scholarship (2022) - for outstanding results in 1st year of BSc degree; only physicist awarded the prize.

SKILLS & INTERESTS

Key Skills: Data analysis & visualisation, numerical modelling & simulation, optimisation algorithms, scientific computing, version control (Git/GitHub/GitLab), technical documentation, web development (frontend & backend), cloud deployment (AWS).

Software & Programming: Proficient in Python, HTML, CSS; experienced with C/C++, JavaScript, AWS, Django, and simulation software (e.g., ANSYS Lumerical).

Libraries & Frameworks: NumPy, SciPy, PyTorch, Scikit-learn, Pandas, StrawberryFields, TheWalrus, Blackbird, Django.

Technical Interests: Software development, machine learning, and modelling complex physical systems.
